About Our Company

Headquartered in Napa, California, Regulus is the leading US outsourcer and integrated provider of bill presentment and payment processing, servicing nearly 2 billion paper and electronic items annually for Fortune 500 customers. Regulus provides an end-to-end solution covering every aspect of a transaction from the point when a corporation releases a billing file for invoicing to the posting of the associated paper or electronic payment, and thereafter in the support of customer care and collections. By exploiting the data from the total

transaction, Regulus offers unique, value-added services that provide measurable results with a positive impact across the payment cycle.

Products and Services

Billing, collections and reconciliation for today's businesses include improving customer service and back-end processing at reduced costs. Companies must meet customer demands for bill presentment options (electronic and paper) and multiple payment channels and instruments (paper, CSP, WEB, IVR, and TEL). Regulus has the distinctive ability to

consolidate, mine and manipulate data in a secure environment to provide innovative paper and electronic-based billing and payment solutions.

How We are Unique

Regulus clients have seen exception items virtually eliminated while customer service and back office support have online access to the necessary details of the payment information with one look-up. Automated processes between the inbound payment and the associated data result in significant improvements covering every aspect of accounts receivable management.
